Important Notes

1. Leverage is dynamic and adjusts automatically as your open volume changes. The applicable leverage tiers are determined based on your total open trading volume for the relevant instrument.

2. Margin is calculated progressively, with each tier's margin rate applies only to the portion of the open volume falling within that tier. For example: for an open volume of 50 lots on AUDUSD in an account with maximum leverage of 1:1000, the first 20 lots are subject to a margin rate of 0.10%, the next 20 lots to 0.20%, and the remaining 10 lots to 0.50%.

3. Clients should monitor their margin levels to ensure that sufficient margin is maintained, as a failure to do so may result in the liquidation of open positions in accordance with the applicable terms.

4. Markets International Limited (the "**Company**") reserves the rights to adjust leverage and amend margin levels under certain market conditions including, but not limited to, when the dealing desk is closed, around major news events, as a result of changes in credit markets, at times of extreme market volatility, low liquidity and/or when the Company deems that a particular exposure is risky and that it is not possible for the Company to mitigate risks.

5. The applicable tiered leverage and margin requirements are subject to the Company's Terms and Conditions ("**Terms and Conditions**"), as may be amended from time to time, which are available on the Legal Pack page of the Company's website at https://www.markets.com/vc/.

6. The Company reserves the right to amend the applicable leverage and margin requirements, from time to time, in accordance with the Terms and Conditions.

7. Risk Warning: Trading leveraged products carries a high level of risk and may not be suitable for all investors. Market conditions can change quickly, and outcomes may vary. This information is provided for general reference only and does not constitute investment advice, financial advice, a recommendation, or an offer to trade. Clients shall ensure that they fully understand the risks before engaging in any trading activities.
